

Chroma Tattoo

Sea Salt Soak:

- ❖ Sea Salt Soak 1-2 times a day for entire healing process
- ❖ Use a cup of hot water (8oz) make sure it is warm enough to open your pores but not too hot to where it will burn or turn your skin red
- ❖ Mix ¼ teaspoon of non-iodized sea salt into water (clean glass every time) until the salt has dissolved
- ❖ Fully submerge the entire piercing for 5-10 minutes
- ❖ Rinse with warm water
- ❖ Lightly pat dry with a clean piece of paper towel or let air dry
- ❖ If infection occurs:
- ❖ Sea Salt Soak 3 times a day until resolved
Flatten bumps while skin is still warm with Q tips by rolling over bumps toward the exit of the piercing (holes) to push out infection and allow to air dry
